connecting healthcare

In partnership
with EMIS Health

Increasing local clinical capacity at the touch of a button

Interoperable shift sharing and booking

Our next generation platform integrates with clinical systems like EMIS Web, allowing your practices to come together to share and fill shifts. One system, one click.

Connect your staff to increase capacity

Create your own digital staff pool to make the most of your existing workforce. You can also cover gaps from our community of local GPs.

Cover gaps with real-time matching

Easily view and assign face-to-face or digital sessions across sites to local GPs who are available to cover.

Increase GP retention

We support your flexible GP pool to feel an integral, valued member of a community. Our retention initiatives are award winning.

Simplify administration

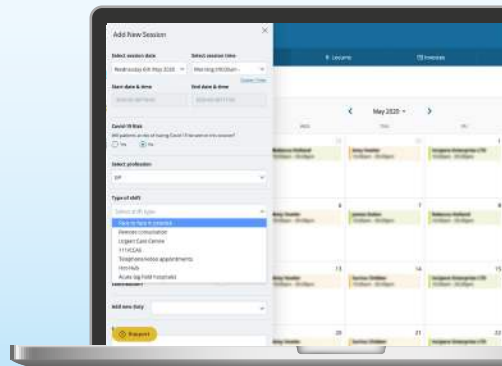

Say goodbye to endless admin. View upcoming shifts, manage payroll and store compliance documents, in one place.

MLM GPs annually

Building a flexible, sustainable workforce

“Using MLM has grown our workforce by over 80% in a few short months.

It offered an effortless ring-fenced platform to recruit, retain and engage our locum GPs. We utilised it for practice backfill and our Covid home visiting service with local experienced clinicians. For our GPs it made it easy to work flexibly and removed all the barriers of managing self-employed work as well as accessing support and CPD to keep them committed to our area.”

- Battersea Healthcare Federation

Frequently asked questions...

1

What is the NHSE flexible pool initiative?

£120k funding is available for each ICS to establish digital connection with their sessional GPs to support flexible working.

2

Will my clinicians be uploaded to a national marketplace?

No, you determine the geography and scope of your community.

3

Do MLM provide clinicians?

We can introduce MLM subscribers, local to you. Our members have a presence across all CCGs.

4

How much of our resources will be required to set up the platform?

Very little. We take care of set up and adoption. We also track and record the reporting data required by NHSE.

5

Is the funding sustainable?

We believe our fixed fee, based on patient capitation is the fairest way to encourage usage, maximise your return and support budgeting. The £120k funding allows use of our platform for an extended time period in which to recoup substantial financial benefits from automating your workforce administration, removing agency fees and retaining a dedicated flexible local team of clinicians.

6

What does your partnership with EMIS Health mean?

MLM innovatively integrates with [EMIS web](#) to seamlessly match availability to demand. One system, one click. EMIS also provides at scale implementation of our digital platform. We are expanding to other clinical systems.

7

What are MLM's peer support initiatives?

We can deliver your peer support initiatives including coaching, training and networking, through our digital platform. Our content is award winning.

★ Trustpilot

“It has been really great working with MLM over the last few years to support flexible working,

recruitment and retention across South West London. Their sessions had brilliant energy which attendees found both engaging and inspiring.”

- Melanie Ashdown, SWL Training Hub

“Being part of MLM’s supportive community helped me

access the support I needed after returning from my maternity break. With more flexibility than chambers and more continuity than agencies, it allowed me to easily connect directly to local practices and build ongoing relationships and balance work with family life. Their CPD, webinars and organisational tools help me to design my week and be more productive at work.”

- Dr E Simpson
